Reminder to Add a profile Picture (Instructions)

Posted by crystalcross - 06 Apr 2011 19:18

Just a reminder. You profile looks much better with a profile picture on it.

If you have an image or picture you would like to add to your profile but you just don't know how to do it. Here are the instructions. Once you have an account and are logged in under your account, click on the "Profile" link in the top bar.

Once your profile page comes up click the "Edit" button.

Then click "Update Your Image"

And finally click the "Choose File" button, find the appropriate image/picture file on your computer.

Select it and click "Open" and then click the "Upload" button.

On the lower right corner then click "Update" and you're done.

_____

Just a reminder again to add a profile picture to your account. It really helps identify with the poster. And also tends to personalize your account somewhat.

_____

Just wanted to bring this thread back to light again and remind new users to please add a profile picture. It's one way that people can get an idea of who you are.
