_____

I did NOT directly hook it up to my digi dictator, but I was able to loop a few, and they are audible taken last evening, still awaiting to get our "shadow person" going down the stairs photos as well.. hopefully my crew gets them too me soon

I know what we caught, but maybe you hear something different... let me know what it sounds like to you.

Just started to edit with this softtware, so some of my clips are kind of long.. sorry
