USS Lexington EVPS

Posted by capot1948 - 23 Jul 2012 10:03

Here are two EVP sessions from my trip to the USS Lexington last Saturday. On the first one in the barber shop at 48-52s, 1:12s-1:15s you can hear something. At 1:22.90-1:23.20s when played at 0.30x normal speed something is heard. On the 2nd session in the engine room at 34-36s you hear a voice and at 40-43s you can hear something. I'm not saying what we hear since I don't want to affect what someone else possibly hears.
