_____

Did you have a camera running or another recorder running when these where recorded? You may have some good catches there, but because a couple of the tones in the second clip are so clear I would want some control audio for comparison to eliminate it being someone living.

_____

In the first EVP around 2 sec. I hear "I see you." right after the man says "come in here". Or am I hearing things? But I do hear the "ya no" as well. In the second EVP, I hear what everyone else does, but I hear "help Lindsay" instead. I don't know, but really, really cool to listen to.
