To me it sounds like:

"We need your help. Help _ _"

I can't make out the last 2 words.

Just asked if anyone wanted to step up and speak. For some reason when I download the evp's from the digital recorder the first part where I introduce myself seems to wash out even though it sounds perfect before download. I think it is the length of the wire I use to download. It can cause degredation of some of the sound.

I think so too. Thank you for your input. I plan to back to the Washburn cemetery where I got the 'she misses you' evp a few nights ago. I got it without the ghost box. I would like to get another like that.

Awsome. I am going to a cemetary close to me it was a old psychiatric hospital and had a graveyard for the patients. The building was burned down a few years ago but it is still sid to go and hear the patients screaming in the graveyard so interested in finding out and getting some evidence.

Should be a awsome investigation. Also said a ghost dog chases you and green eyes appear. We just did a home investigation and i am a sensitive and had the woman spirit talking to me. We also had a toy play london bridge over the baby ,onitor and it didn't record and we were all downstairs. It later recorded when i pushed it though. I hope to get my usb fixed soon so i can shre audio. We had a mans voice whisper but couldn't hear what it was saying.
