_____

This is of glass breaking in the middle of a cemetary. We do not know a whole lot about this cemetarty yet. the road its on is very weird and has blind spot.

Very interesting EVP! Were you where there was a chain link fence? Almost sounds like the sound of a chain link fence gate closing.

Doesn't have the ringing of glass, but rather large metallic object. Very cool! I'll try to slow it down, and see what it sounds like.

_____

Well there was a fence around the cemetary. If I recall nobody was near it.

Even better!

You have a sound, possible source of the sound, and no explainable reason for it to happen.

Nice work!
