Audio from the IR Night vision camera test

Posted by LishaM01 - 17 Jun 2011 06:08

I separated the audio from the video file so that it could be more easily enhanced.

After analyzing the audio seperate from the video portion of the file, this is what I believe it says:

"you never complain"

OK folks I have changed my mind. I spent a lot of the day listening to this over and over and I now believe it says:

"You've gotta get away"
