Well we were not even doing evp work at all at the time. we just happened to walk in the drunk tank and the olvious x said this on photonic mode. the photonic mode runs the basis of human speech thus how its kinda hard to make an exact assumption of what it really is saying.

BHPIJosh I completely understand where you are coming from. The olvious x device i was using was seen on Ghost Adventures and right on the device it does say for entertainment purpose only. I dont use this device when on a actual paranormal investigation in a private house. I do have a shack hack or franks box as they are called and I do get better results. I have modded mine further and removed the FM atenna so I have no FM reception and yet somehow voices to come in and out which is odd to me. I do respect your opinion. We all have different ways of doing what we do.

i have personally use this device and there are times where i think i wasted my money but i have had

times where when i ask questions it does respond. Every investigator has their own way of doing things and with the equipment they use. As for the franks box...i like and use it it works good with my investigation style and it also has proven to work. I for one am not sold on the k2 meters. too many times have i seen things mess with it. but their are alot of people who use it and they love it. This is why the paranormal investigation is under fire alot because so many things can work for some people and not others and no one can agree. so here is to agree/disagree. either way i think it says a$$hole due to i am around it alot and i would like to add it is amazing it said more than one word cause these devices normally dont.

_____

I agree with Tresses, I love it when they curse. One can't expect them all to be a saint in communicating with niceties, acting like a proper lady or gentleman and being charming! LOL
