scream

_____

The location is private. It was a empty house. A few members were picking up something and haveing weird feelings. On our way back to the first level I caught this. I hear suffer a lot, but not in the usual whisper or faint voice but screamed. None of us heard it with our ears. I did not enhance this file at all. When I first heard it, it gave me the chills. Everytime I hear it, it gives me the chills.
