Old Hebron Visit 1 EVPs

Posted by CMSI - 01 Oct 2011 16:47

_____

The EVPs we captured using our Olympus voice recorder. These are what we think they say.

1. The most heart-wrenching EVP we've captured. It sounds like a little girl tying to say "Help me" but she only gets out the "help" and saying a few syllables soon after. It's hard to try to make out what she says as it sounds like she's crying while she's trying to say it. We captured this later in the investigation.

2. We were making our way down to the little girls cemetery earlier in our investigation. The spirit sound like a middle-aged male that clearly did not want us in that part of the cemetery. It sounds like it says "go" or "no".

3. These cries were captured mid-way through the investigation. We have no clue what they were and didn't hear anything like these sounds throughout the entire investigation.

@osty we haven't had that happen yet, but i positively believe we'll hate it when it does.

@flower The first time we went all we really did was walk around with a voice recorder in our hand. I was pretty serious about investigating, but the other two I was with weren't. Vernon (not in CMSI anymore) was kinda disrespectful. He stole a coin off a tombstone (the date of death was his exact date of birth by the way), but he put it back and even left a coin of his own. The second time we walked around trying to make contact, but we left because the vibes started to go south.
