Another strange whisper
Posted by lynzije1 - 20 Nov 2011 22:22

_____

About 3 seconds in you can hear a whisper then at 6 sec you hear another. This was just after asking for a name.

_____

I have to admit, when I first heard this I was saying to myself that I can't hear a thing. But on a hunch I decided to download the file and then enhance the volume WAY WAY up. When I did, I heard what you were talking about. GREAT evp, and if you don't mind I'm going to run noise reduction algorithms on it, and then upload it again.

_____

Here is the same audio file.

The process used was with Audacity.

45x volume increase.

Then a special noise reduction profile

Then another 7x volume increase.

The second part seems to be saying "I'm not Happy".

But it seems to have a British accent... Or perhaps a strong Scottish accent...

_____

kind of sounds like he is saying woman, who's that..very very low whisper..
