4 channel DVR

Posted by zookeeper - 26 Sep 2011 14:22

_____

My husband owns a computer store, and has some new in box equipment for sale.. he never considered it ghost hunting equipment, it is for home and business security systems.

He has a Lorex 4 channel DVR system with an 80 gig hard drive for $275

Or if you prefer a bunclle package, it can come with 3 cameras, which include night vision and IR (I believe 2 of the cameras are Lorex and one is Achiever, and wireless) and the whole package is $500

Just thought I would throw it out there. If you want more detailed information, feel free to ask and I can get the info for you.

Sue
