TAPS app

Posted by zydecopolka - 07 Feb 2013 22:57

I just saw this tonight and thought it might be helpful for investigators on a tight budget.

play.google.com/store/apps/details?id=co...eature=search_result

It's probably around $5 (price is shown in Norwegian kr for me), includes an EMF detector, geophone, and digital recorder. 4 1/2 stars.

A smart phone or a tablet dose not have the physical ability to work as a geophone, so don't bother.
