Classic Matrixing

Posted by lbuchanan - 07 Mar 2012 02:29

This was a picture taken of me at a recent investigation. If you notice the window, to the untrained eye it would appear to be a little girl with black hair is staring at me through it. Yet it is not. Actually what you are seeing is the reflection of a christmas tree on the other side of the room with ornaments on it. As professional ghost hunters we come across this sort of thing all the time, yet is very important to keep an open mind and not just associate the first thing we see to paranormality. Things need to be analyzed before commiting them to anything out of the ordinary. I would like to thank a fellow team member for debunking this photo. I presented it to the team because I thought it was out of the ordinary and wanted to get their expert opinions. The result was an explination that is both clear and understandable.
