_____

I have had three occasions that I know of seeing time travlers each time there were witness to the events. About 10 years or so my wife and two other women friends would go to yard sales on saturdays they would map the sales out on friday. This week I was their driver I would always take a cup of coffee with me and a book. We drove down a oneway street and stopped at the yard sale, at the same time a 1965 chevy pulled up behind us it looked as if it was new I got out of the car and greeted the two middle aged women who at that time was dress in the 60s they had the hats and looked like they had just came from church. I remarked on there car and the one said I just bought it.Carol one of the women said where did you get it she looked puzzled and said Beaslies. which has been closed for years. We just looked at each other and went on to the yard sale when we started to leave they followed and got in their car and was behind us they were so close I told the girls I think they are going to hit us we had to stop everyone was looking behind when the car vanished. We all said the same thing at the same time they had to pull into a driveway. We backed up to see but no one we drove around the block and stopped at the yard sale and asked the people there if they new who those ladies in the chevy was they looked at us and said you were the only people we have had this morning.

I'm a Trekker as well and Spock has always been my favorite. I got to see Leonard Nimoy speak at Virginia Tech several years ago and I met Zachary Quinto, as well as saw him in a play in NYC, a year

ago.
