Paranormal Slide Shows

Posted by Steven Matrix - 10 May 2012 22:47

Hey Folks:

Someone put me on to a great little website where you can create your own little video type of presentation from your still photos. You get 30 seconds for free, which will be perfect for most.

This may be an option, rather than posting several pics on the front page at once; which is sometimes a little redundant. You can put in about 10 photos. It's a fast transition, so it's still good to post your main paranormal pics on G & H for discussion.

You can even add music, which I have done. Check it out.
