Is there a time limit on earthbound spirits?

Posted by normanglasser1 - 19 May 2013 00:08

Humans has been on this earth for thousands of years . So has any one seen a caveman? If not why not, what is your opinion. This may sound a little funny but think about it. I have never seen or talked to anyone that has witnessed a prehistoric human.

The ancient humans I have always thought to be as intelligent as we are and in some cases more. an Example take most of us and sit us naked in the woods and tell us to survive not many of us would on the other hand, they could survive in our society.As far as their feelings I think they had the same as ours today as emotions are concerned .

I feel that there is much more to spirits then just residue energy I do believe this phenomena exists but not the total answer. The possibilities are endless.So the question remains the same Do earthbound spirits have a time limit? and if so what is that time line.

Others think the same way as you, sounds like a second death. What I would like to think is that they go on to a higher plane of existence. but in reality you are probably correct. Thanks
