Past Life Reading

Lastnight while in cht six picked up on a spirit named Marjorie. This usually isn't bnormal at night for her and i too draw in spirits or do readings while in chat but this one was diffrent.

It just so happens that Leslie in a past life was directly related to the spirit itself. The woman was on her way to her wedding and was thrown from the carriage and died immediately. Leslie knew ythis was true during the reading because of her being related to this in her past life. This took place in 1887. So for those of you that want to know if past life is real this is the truth being told now.

I had to help six help Marjorie cross over to the other side because of the sadness Leslie was going through being that she had seen this and the funeral.
