Our special thanks to Alameda Paranormal Research for a great night and a successful Live Investigation.

Starting out at just a few moments after 8pm Mountain time, it didn't take very long for the action to start at the Stanley Hotel in Colorado. Sommer from APR had asked for any present spirits to turn on some of the provided flashlights, and sure enough they did. This happened several times through out the night.

At one point during the investigation, Sommer from APR had left us (the viewers) alone in the room to watch for any activity. And as an experiment we all concentrated on room 418 of the Stanley (where the investigation was taking place) and asked for the spirit of the little child to open the bathroom door. Instantly as if on queue, the little flashlight was turned on. To verify, we asked for the flashlight to be turned on, and then the door made a noise. Finally to test one more time, we asked for the door to be opened, and the flashlight came on again. And mind you the flashlights did not just go on randomly at various times.

With many different chances for interaction for our viewers this was a very very successful Live Investigation. So our thanks to Alameda Paranormal and Sommer! Thanks guys!

_____

My favorite part was when we were stuck in the bathroom together. Sorry guys but the ambiance in there was magical! Even the spirits thought so, as they made a clanking noise for us. Sounded metallic!

Least favorite part, being in the closet for way too long. Was starting to go stir crazy in there. I think it was the colorless walls that did it. Hangers didn't move though. Sound had to be coming from the bathroom.

_____

Thank you for last night's take along it was the most amazing for me to see the lights flicker on and specially my favorite was the whistling it sounded like it was right in the mic so clear, but then Im thinking if it might of been outside, not sure, but it was cool anyways, yes the bathroom was fun but the closet I didn't get nothing...but all in all I had a great night and thank you for letting us come along, I hope more are to come in the future, I know that it's hard with out your stuff.. I was gonna tell you to take snap shots where the lights went of to see if we you could capture anything i forgot,haha..well thank you again, I hope to do one , one day, in the meantime I will take my camera everywhere I go and take pics ..Hugs...Angelina

_____

Well, one Live Investigation down. About 10,000 more to go! Still looking for more groups interested in hosting some Live Investigations.

LIVE INVESTIGATION page Update

Well just wanted to give everyone a heads up. Over the last few days since the very successful Live Investigation with Alameda Paranormal Research, I've been working frantically to enable our Live Investigation page to incorporate multiple streaming sources.

Originally the Live Investigation page was fashioned with LiveStream technology. But due to the ads, and some streaming issues, and also the inability to stream multiple feeds we opted to create our own in-hosue streaming technology. This enables us to add features and do it in a way that makes it free to all of our affiliate groups and agencies. Also it enables us to completely incorporate it into the system as well as the investigation tracking application we are building.

Over the last few days however, I have come to realize that its not completely realistic to expect all groups to utilize our streaming technology. Some may wish to use LiveStream or UStream technology. Because of that we've been working frantically to add those streams into our existing framework. Over the last 2 days you may have seem some strange looking pages on the system as we disturb the dust. Our appologies for that, but its one of the effects of constant progress.

I'm pleased to announce that we're almost there. Likely before the end of the week the LiveSTREAM technology will be seamlessly incorporated into our Live Investigation system creating a experience which is the same from our member's viewpoint whether the streams are coming directly from our system, or via LiveStream. We're hoping to also provide the same for UStream within the next few

days.

And for the Groups or Agencies out there looking to make use of our Live Investigation technology, we're also frantically working on creating a Encapsulation plugin so you can stream our live stream on your own website as well.

You speak, we listen. Aside from being Paranormal Investigators, we also pride ourselves in being a beginning to end Paranormal Investigation Support company.
