Birdcage Theatre

Posted by McFlyFan - 16 Apr 2012 05:22

I took this photo at the Birdcage Theatre in Tombstone, Az a few years back. When I looked closely at it, I could see some streaks of light going across the whole photo. The link below leads to a photo found on Ike Clanton's "Ghosts of Tombstone" website. It says it was taken by a woman named Claudia Jordan. There are streaks of light there too. I just think it's odd that we both have the same phenomena going on in our photos despite them being at different angles. What do you think?

Welcome, to this site, honestly to me it looks like reflection, but a great photo nonetheless.

I would agree - I think there is a lot of glass in the photo which might explain refracting light even when the picture is taken from different angles. Looks like a great place though.
