What are we looking for here? I'm not really seeing anything except the statue and the tree. Please explain

There appears to be an orb at what is the back of the statues head and i'm not totally sure but there may be something at the base of the big branch over to the right where it connects to the tree.

Guys what you're seeing  behind the head is a group of leaves, at the low lighting it looks like an orb.

Here is that image:

And the tree branch...

Actually thats a great idea, except I would go one farther and say.  Long-exposure images with a IR filter.
