Now doesn't that one look funny? almost material, haven't shaped yet, young, a calf/cub it will get stronger as it was just drinking. They gather strength, what use is a holler if it is ignored? Alarming you didn't bring any changes I might as well leave and let you battle them cause I am sure they will come here (ie to this forum) and try to waste us all.

Took the image, and zoomed in. Then inverted the color to get more contrast, enhanced the distribution of the colors and then re-inverted to get a more true representation.

After doing that , it brings out the contrast in the surrounding objects. And you can clearly see a grave marker, and another stone behind. And what looks like something horizontal, I can't tell if its a stone or a dirt pathway giving off some heat.

Although in front of the rear stone there appears to be some sort of humanoid figure.
