Odd picture

Posted by shanwvr88 - 11 Sep 2011 01:54

Hey i'm gonna try to get to a computer to post this picture but i'm looking for possibilities as to why a photo came out like it did. In the photograph everything in close vicinity to the group member taking the photo is stable and clear but the middle (well what was being directly photographed is quite blurry like what was being photographed was in motion which it wasn't. Please if anyone has any possible reasons for this phenomena I am very open to hear. Again i'm trying to get access to a computer so I can upload the pic. Thanks in advance for any and all assistance.
