Alaska 2003 Vapor

Posted by Khateyes - 25 Sep 2011 18:41

_____

These three photo's were taken close together. One of the ship, then the vapor, then an interesting carving on a tree. No one was smoking nearby.

Was taken with a Canon Powershot, DS100, Digital Elph.

When I took the vapor photo I didn't notice anything like vapor.

We always kid the person in the photo, he is always the one who we joke has spirits in his photo's.

My first attempt at uploading a photo hope this works

Thanks, K
