I'm curious, whats the smoke in the picture. Were you smudging at the time when this was taken? Interesting picture. What was this taken with, looks like a standard camera with a flash?

We Use Olympus Cameras And Yes There Is A Flash On This Particular Pic.The Picture Has Been Enhanced and As For The Smoke,Its Not Smoke,And Its Not Smudging.There Has Been Some people Saying It Is Cigarette Smoke,Fog,,ETC.....NO! It Is Not.It Is A Ectoplasmic Mist That Was Able To Gather Enough Energy From Its Surroundings To Begin To Manifest And There Is Another Pic On Here With The Ectoplasmic Mist.Hope This Helps Thanx

The reason I asked is because properties of the mist show that its larger towards the top and more condensed towards the bottom. This generally indicates heated mist, as the properties of a heated vapor or mist are that it rises and as such expands as it does. Do you have an videos of mists forming? That would be really something to see.

_____

this is cool I see it, I also see a face of a girl, unless it's just the light, I can see many faces as well,,good pic

_____

Do you have a copy without the big circle on it? I'm curious to get an impression for myself if you don't mind.
