This picture was taken in a friend's kitchen when he was just snapping random pics with his BlackBerry!

Dear Believer, I'm afraid your friend is pulling your leg. Or someone is somehow messing with him.

The same exact image has appeared in multiple pictures including a hoax out of Romania.

I know we all hope to see the holy grail of the Paranormal, a full body spirit in full form.

But the reason we all want to photograph it so badly is because its something that's seldom seen. And when it is, its hardly ever at the level of detail in this photo.

Here is another photo from the internet with the same lady:

Sorry to disappoint... By by no means give up looking!

I hope you find it!
