EVP on v	video	audio
Posted by ibur	yem - 11	Apr 2012 17:23

Just found this one, and really don't have a way to analyze it without watching it, are there programs that you can just pull the audio off of the video? Its at the very beginning (first 6 second of the video) I had to hang my camera from a chandelier since the furniture was already taken out.
