Mike & GG-Crew,

Once again a spectacular video. You guys never fail to create wonderful pieces. And you know I am and will be a big fan.

One thing, and this is just a personal remark and does not reflect the opinion of anyone but myself, I'm not sure if I completely agree with the use of a Gun as a trigger object. I understand the goal, but would worry as to the message it sends to other aspiring investigators and the paranormal community in general.

Also I am concerned about your safety, as entities have been known to effect even trained paranormal investigators. So please be careful.

As always, I'm behind you and impatiently await more videos!

Awsome Mike and GG crew. Can't believe how good you all have been in your videos. This is a inspiration to those of us who start our own team and look forward to growing into what you have been so good at.
