_____

I am wondering how many of you think the same way i do. i read alot of post and see that we all share alot of the same ideas. So here is one i have been wondering for sometime now and what to hear what your thoughts are...

Can ghost actually see us or can they see ouur auras only?

I for one believe that they can do both since i have gotten evp of them answering my question of what color hair do i have...but i have notice that when i do an investagation i always surround myself in white light(mostly for protection) but when i do this i get alot of activity so what do you guys think?..

_____

I believe they can see both. The first thing they see is the light we as sensitives or other abilities put off to draw them, thinking this is the light to crossover. But i believe once they come to us they do see us as well. Good question.
