Flir i3 or i5 thermal camera

Posted by www.beyondbeliefparanormal.co.uk - 14 May 2011 01:28

Just wanted to ask if any one on here has had any experiance with either of these thermal cameras? renting one in the next few days and just wanted to get some feed back from other members before i take the plunge and buy one, thanks every one any input would be a great help

---

thermal cams indicate heat of a living body or other than common temp sphere, night vision indicates images and other forms not recognizable by the human eye either in daylight, or night vision times, i have both, but dont use them in ghost hunting, they can sense their presence, you will enjoy the experience, have fun
