Paranormal Experiences

Posted by paranormaleffects - 01 Jun 2011 19:31

For many, having a paranormal or unexplained experience can be intriguing and exciting. For others, it can be traumatizing… even cause long-lasting, debilitating problems.

We (Screaming Flea Productions, Inc.) are working on a new documentary-type show aimed at helping those who've been traumatized by a past paranormal or supernatural encounter. The program will be driven by the personal stories of individuals who are struggling to cope with the emotional and psychological aftermath of their experience(s). They will have an opportunity to work one-on-one with a licensed therapist towards understanding and overcoming their traumatic ordeal.

The purpose of the therapy provided on the program will not be to debunk or prove a phenomenon. Rather, the focus will be on the trauma that has resulted from the claimed experience and the therapeutic assistance involved in the individual's recovery process.

We are searching for individuals who are open to sharing their story and receiving professional help at the same time.

If you or someone you know has been negatively affected by a paranormal or supernatural experience and has reached a point where they're unable to function at home/work or in everyday life, we'd like to hear from you and see if we can help.
