Chip Coffey's "Growing Up Psychic"
Posted by TressesOfNephthys - 03 Jul 2011 19:08

Chip Coffey is writing a book called "Growing Up Psychic" which will contain stories from people (adults and kids included) about their experiences growing up psychic. I'm still on the fence about doing this myself, since many of my experiences are going into my own book, but I'll post the link to the questionnaire in case anyone else is interested.

---

i thought it was common sense that people did that! im very sure that the people involved that are going to written about in the book have knowledge that their story or stories will be in a book!

Well, like I said, I know nothing of the writing industry. It just sounded kind of odd to me although o have read books with contributing authors. I just wasn't sure of the legalities. But you are right, I guess it's kind of a crap shoot when you get involved in collaborations unless everything is crystal clear.

I understand the excitement of getting your work in print, but somehow it seems so wrong not to get compensated for it. But then, I'm not a writer and I don't understand alot of what goes on in that world lol.
